

Stroke treatment in 2017: It's about time.

with **Richard H. Swartz, MD PhD FRCPC**

Assistant Professor of Neurology, Department of Medicine,
University of Toronto

at **Women's College Hospital**

Auditorium, Rm. 2501

Wednesday, March 22, 2017 @ 12:00 to 13:00

LEARNING OBJECTIVES:

At the end of the presentation, participants should be able to:

1. Be aware of the major changes in hyperacute stroke treatment over the last 20 years (i.e. why 1994, 2004 and 2014 are all ancient history);
2. Summarize the importance of timely assessments and interventions for ischemic stroke, TIA, hemorrhagic stroke and the implications of these time factors both for individuals, health systems and the general public (i.e. the need for speed – what to do if your patient, neighbor, relative or friend has symptoms); and
3. Appreciate the long-term impact of stroke (i.e. why “good” is not yet “good enough”) and how research across UofT (and beyond) is addressing these issues.

INTERACTIVE VIDEOCONFERENCE:

Baycrest – Telehealth Boardroom

Sinai Health – Bridgepoint – G.001

Sinai Health – MSH – Main Auditorium, 18th floor

St. Michael's – LKSKI - Keenan Research Centre Auditorium - 2nd fl.
